2

- Date of survey: 15-18/6/2020
- Survey method: Random telephone survey conducted by real interviewers
- Target population: Cantonese-speaking Hong Kong residents aged 18+
- Sample size: 1,002 (including 497 landline and 505 mobile samples)
- Effective response: 54.1%
- Sampling error: Sampling error of percentages not more than $\pm 3\%$ and that of ratings not more than ± 0.16 at 95% conf. level
- Weighting method: Rim-weighted according to figures provided by the Census and Statistics Department. The gender-age distribution of the Hong Kong population came from “Mid-year population for 2019”, while the educational attainment (highest level attended) distribution and economic activity status distribution came from “Women and Men in Hong Kong - Key Statistics (2019 Edition)”.

Survey Topic

3

- People's level concern for social problems

Survey Result - People's level concern for social problems

4

• Ratio of people's concern for social problems

	13-18/12/2019	15-18/6/2020	Change	Record
Livelihood problems	41%	44%	▲3%	Record high since Dec. 2018
Political problems	40%	35%	▼5%*	Record low since Dec. 2018
Economic problems	16%	19%	▲3%	Record high since Jun. 2016

- Latest survey shows that using a one-in-three choices method, 44% and 35% of the respondents were most concerned with livelihood and political problems respectively, while 19% attached their greatest concern to economic problems. Compared to half a year ago, the percentage of people most concerned with political problems has fallen back by 5 percentage points from historical high.

* Significant change

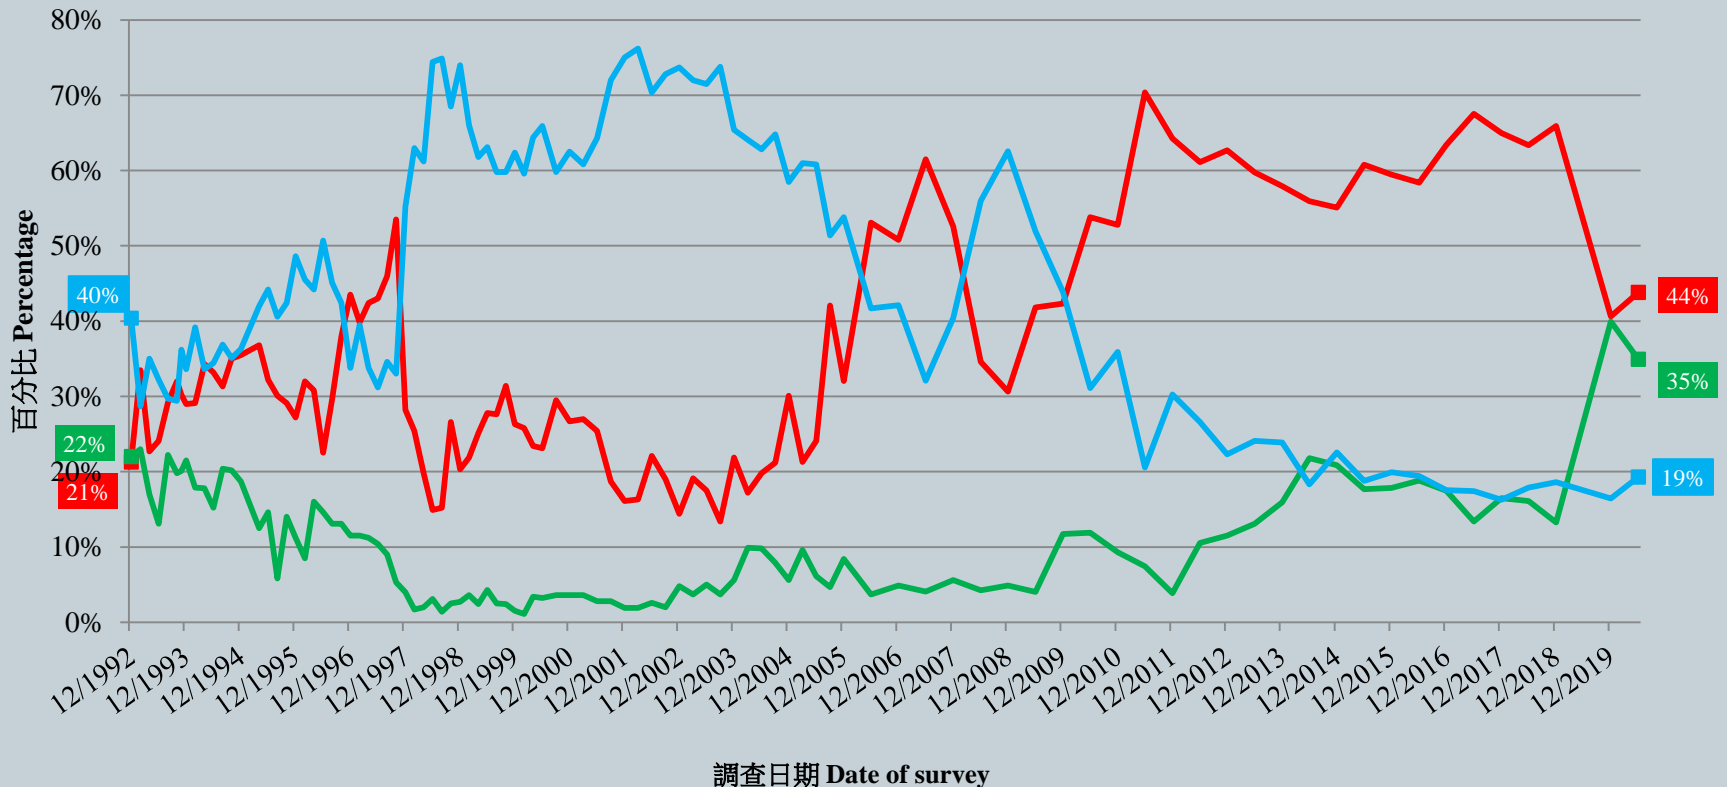

Survey Result - People's level concern for social problems
