2

	香港民研意見群組成員 HKPOP Panel
調查日期 Survey date	16/4 15:00 – 21/4 15:00
調查方法 Survey method	以電郵接觸群組成員，並於網上完成調查 Online survey
訪問對象 Target population	十二歲或以上的香港市民 Hong Kong residents aged 12+
總成功樣本 Total sample size	6,330
回應比率 Response rate	6.7%
抽樣誤差 Sampling error	95% 置信水平，百分比誤差 +/-1% Sampling error of percentages at +/-1% at 95% confidence level
加權方法 Weighting method	按照1) 政府統計處提供的全港人口年齡及性別分佈統計數字、各區議會人口數字； 2) 選舉事務處提供的區議會選舉結果；3) 常規調查中的特首評分分佈數字，以 「反覆多重加權法」作出調整。 The figures are rim-weighted according to 1) gender-age distribution of Hong Kong population and by District Councils population figures from Census and Statistics Department; 2) Voting results of District Councils Election from Registration and Electoral Office; 3) rating distribution of Chief Executive from regular tracking surveys.

中科監察研究員潘麒智指出，「疫情至今已經持續超過一年半，一波又一波的爆發，幾乎都是由外地傳入，如果政府繼續把關不力，不好好地對所有從外地來港人士進行嚴格檢疫，就算香港市民嚴守限聚令，兼全體注射疫苗，根本都不會對防疫有大幫助。變種病毒一樣會透過境外輸入影響香港，市民做足做齊政府的指引都無補於事。我期望政府向來港人士實行更嚴格的檢疫措施，甚至要求所有來港人士需接種疫苗，及實施更長檢疫期，避免變種病毒侵襲市民。」

KC Poon, researcher from the CHINAT Monitor, observed, “The epidemic has been going on for over a year and a half now, with wave after wave of outbreaks, mostly caused by imported cases. If the Government continues to be ineffective in gate-keeping and does not strictly quarantine all people coming to Hong Kong, it will not be of much help in preventing the epidemic even if Hong Kong people strictly adhere to the gathering restrictions and all of them are vaccinated. Mutant viruses will continue to affect Hong Kong through importation. I hope that the Government will impose stricter quarantine measures on visitors coming to Hong Kong, even requiring all entrants to be vaccinated, and to implement a longer quarantine period to prevent the virus from infecting the public.”
