Group Gathering Prohibition Index – Commentary

公共衛生研究社召集人陳盈博士指出：「防疫日久，市民對社交距離政策逐漸疲怠。長遠而言，社會需要尋求高強度社交區隔措施以外的防疫出路。近日本港再次出現零星感染個案，社會可能會重新聚焦於防疫政策。社會可趁此機會加快推動長者接種疫苗，以及培養社區未來面對零星爆發的韌性。」

Convenor of Hong Kong Public Health Research Collaborative, Dr Crystal Chan observed, “As the pandemic persists, the public is getting exhausted with the social distancing measures. It is vital to seek other solutions to the prolonged pandemic situation worldwide. Public attention may focus on epidemic prevention these days as new cases emerge. This could be a golden chance for members of the public to encourage vaccination among the elderly, and lay plans to build resilience against future epidemic outbreak in the community.”
