PopPanel Research Report No. 126 cum Community Democracy Project Research Report No. 79 cum Community Health Project Research Report No. 75

Survey Date: 13 January to 7 February 2022

Release Date: 8 February 2022

Research Background

Initiated by the Hong Kong Public Opinion Research Institute (HKPORI), the "Community Integration through Cooperation and Democracy, CICD" Project (or the "Community Democracy Project") aims to provide a means for Hongkongers to re-integrate ourselves through mutual respect, rational deliberations, civilized discussions, personal empathy, social integration, and when needed, resolution of conflicts through democratic means. It is the rebuilding of our Hong Kong society starting from the community level following the spirit of science and democracy. For details, please visit: https://www.pori.hk/research-reports-en/cicd.html?lang=en.

The surveys of Community Democracy (CD) Project officially started on 3 January 2020, targeting members of "HKPOP Panel" established by HKPORI in July 2019, including "Hong Kong People Representative Panel" (Probability-based Panel) and "Hong Kong People Volunteer Panel" (Non-probability-based Panel). This report also represents Report No. 126 under HKPOP Panel survey series, as well as Report No. 79 under the CD Project survey series. Since CD Project aims to gauge the opinions of members in different communities, HKPORI needs to continuously recruit new panel members and map their profile with their respective constituency areas to form "HKPOP Community Panel" including "Community Representative Panel" and "Community Volunteer Panel" first, and then conduct the research.

In view of the outbreak of Novel Coronavirus (also known as "Wuhan Pneumonia") in late January 2020, HKPOP kick-started the "Community Democracy Project: Community Health Module" or "Community Health Project" using a PopPanel survey design to study the public's views on the epidemic and the Government's relevant polices using small communities such as housing estates as the unit of analysis. The survey covers people's views on their perceived chance of contracting pneumonia, appraisal on the government's handling of the disease, impacts of the border closure, calls for strike by frontline medical staff, community outbreak, work-from-home arrangement, immigration controls, general use of face masks as well as the government's implementation of relevant policies. This is the Report No. 75 under the Community Health Project survey series. The special feature of the Community Health Project is the lowering of respondents' age bracket to 12 years old, in order to obtain more comprehensive samples.

HKPOP sent out emails to all panel members at the beginning of the survey, inviting them to fill in the questionnaire at the designated online platform. Members were allowed to make repeated submissions, while only the last submission of each individual member would be used for analysis.

Contact Information

Herewith the contact information of the "Community Health survey":

Table 1: Detailed Contact Information

Survey method	Online survey
Target population	HKPOP Panel samples, namely Hong Kong People Representative Panel (Probability-based Panel) and Hong Kong People Volunteer Panel (Non-probability-based Panel)
Weighting method	Rim-weighted according to 1) gender-age distribution, educational attainment (highest level attended) distribution and economic activity status distribution of Hong Kong population from Census and Statistics Department; 2) appraisal of political condition and political inclination distribution from regular tracking surveys.
Date of survey	13 January, 3pm – 7 February, 3pm
Total sample size	7,024
Response rate	7.9%
Sampling error [1]	Sampling error of percentages at +/-1% at 95% confidence level

[1] All error figures in this release are calculated at 95% confidence level. "95% confidence level" means that if we were to repeat a certain survey 100 times with different random samples, we would expect 95 times having the population parameter within the respective error margins calculated. Because of sampling errors, when quoting percentages, journalists should refrain from reporting decimal places, whereas one decimal place can be used when quoting rating figures.

PopPanel Composition

Regarding data collection, survey data from both the Hong Kong People Representative Panel and Hong Kong People Volunteer Panel were collected in the form of online questionnaire.

Among them, the Hong Kong People Representative Panel comes from members of the "HKPOP Panel" recruited in regular random telephone surveys. HKPOP uses "HKPOP Panel" as a framework for conducting surveys for different research projects, any eligible family member in the household may be invited to participate in a specific research.

Meanwhile, members of the Hong Kong People Volunteer Panel are recruited online. Citizens only need to self-register in HKPORI website to participate in online questionnaires.

All panel data collected will be adjusted using rim-weighting, to minimize the effects of self-selection bias or participation bias. Details are documented in the Weighting Procedure section.

Response Rate

HKPOP adopts a set of contact definition in compliance with most international standards. Historically, the social research community in Hong Kong has developed its own set of contact rates, cooperation rates, response rates, and so on. HKPOP normally reports the "success rate" for online surveys.

The calculation of the success rates in this study refers to the following tables.

Table 2: Calculation of success rate of the HKPOP Panel (by HKPOP definition)

$$\begin{aligned} \text{Success rate} \\ = \frac{\text{Successful cases}}{\text{Panel size of the HKPOP Panel}} \times 100.0\% \\ = \frac{7{,}024}{88{,}449} \times 100.0\% \\ = 7.9\% \end{aligned}$$

.

Weighting Procedure

HKPOP has continuously adopted and enhanced its weighting method over the past few decades. For this survey, HKPOP adopts a "2 by 5 by 2 by 4 by 5 by 4" weighting procedure involving six variables, namely, gender, age, educational attainment, economic activity status, appraisal of political condition and political inclination. Basically, the raw data of practically all random telephone surveys conducted by HKPOP are rim-weighted by the figures obtained from the Hong Kong Census and Statistics Department so that the marginal distribution of the sample in terms of gender, age, educational attainment and economic activity status would match with that of the general population figures from the Hong Kong Census and Statistics Department. The marginal distribution of the sample in terms of appraisal of political condition and political inclination would match that of the general population in HKPOP's regular tracking surveys. This rim-weighting method (sometimes called raking) is found to be the most practicable method in processing HKPOP's survey data.

Specifically, the gender and age groupings used for weighting are as follows:
- Male 12-29
- Male 30-39
- Male 40-49
- Male 50-59
- Male 60 or above

- Female 12-29
- Female 30-39
- Female 40-49
- Female 50-59
- Female 60 or above

The educational attainments used for weighting are as follows:
- Secondary or below
- Tertiary or above

The economic activity statuses used for weighting are as follows:
- Working population / Others
- Home-makers / Housewives
- Students
- Retired person

The appraisals of political condition used for weighting are as follows:

- Very satisfied
- Quite satisfied
- Half-half // Don't know / hard to say // Refused to answer
- Quite dissatisfied
- Very dissatisfied

The political inclinations used for weighting are as follows:

- Pro-democracy camp
- Pro-establishment camp
- Localist
- Centrist // Other // No political inclination / politically neutral / do not belong to any camp // Don't know / hard to say // Refused to answer

Quantitative Analysis Results

Quantitative analysis results of the "Community Health survey", after applying the weighting procedures, are as follows. Since 2022, survey results will be presented in combined figures (i.e. samples collected from the Hong Kong People Representative Panel and Hong Kong People Volunteer Panel) instead of separated by the panel type.
Table 3: Q1 Survey results; Survey period: 13/1-7/2/2022

Opinion Question[2]	Combined (Base=7,000)		
	Don't know / hard to say	Try to predict	Average
Q1 What do you think is your chance of being infected with **novel coronavirus pneumonia**, also known as Wuhan pneumonia, in the coming one month? **[Logarithmic Scale]**	23%	**77%**	**15%**[3]

[2] Answer options included: 0-10 rating scale, others and don't know / hard to say. Answer options changed from linear scale to logarithmic scale since Oct 2020. Questions asked remain unchanged while options of lower probability are further broken down and increase gradually in logarithmic scale.

[3] The difference between the figure and the result from the previous survey has gone beyond the sampling error at 95% confidence level, meaning that the change is statistically significant prima facie. However, whether the difference is

Chart 1: Q1 Combined Chart

Assessment of the public's expected chance of COVID-19 infection

Table 4: Q2 Survey results; Survey period: 13/1-7/2/2022

Opinion Question[4]	Combined (Base=6,997)			
	Satisfied	**Half-half**	**Dissatisfied**	**Mean[5]**
Q2 How satisfied or dissatisfied are you with the **government's performance in handling novel coronavirus pneumonia**?	20%[6]	18%	**61%[6]**	2.1[6]

[4] Answer options included: very much satisfied, somewhat satisfied, half-half, somewhat dissatisfied, very much dissatisfied and don't know / hard to say.

[5] The mean value is calculated by quantifying all individual responses into 1, 2, 3, 4, 5 marks according to their degree of satisfaction, where 1 is the lowest and 5 the highest, and then calculate the sample mean.

[6] The difference between the figure and the result from the previous survey has gone beyond the sampling error at 95% confidence level, meaning that the change is statistically significant prima facie. However, whether the difference is statistically significant is not the same as whether they are practically useful or meaningful, and different weighting methods could have been applied in different surveys.

Appraisal of HK Government's performance in handling novel coronavirus pneumonia
Appendices

Appendix 1: Demographic profile of respondents

Gender:

	Raw sample		Weighted sample	
	Freq	%	Freq	%
Male	3,872	55.1%	3,313	47.2%
Female	3,137	44.7%	3,692	52.6%
Other	15	0.2%	19	0.3%
Total	7,024	100.0%	7,024	100.0%
Missing case(s)	0		0	

Age:

	Raw sample		Weighted sample	
	Freq	%	Freq	%
12 - 29	992	14.1%	1,385	19.7%
30 - 39	1,723	24.5%	1,098	15.6%
40 - 49	1,741	24.8%	1,147	16.3%
50 - 59	1,613	23.0%	1,272	18.1%
60 or above	950	13.5%	2,121	30.2%
Total	7,019	100.0%	7,023	100.0%
Missing case(s)	5		1	

Education attainment:

	Raw sample		Weighted sample	
	Freq	%	Freq	%
Primary or below	13	0.2%	55	0.8%
Secondary	1,078	15.8%	4,377	64.2%
Tertiary or above	5,731	84.0%	2,389	35.0%
Total	6,822	100.0%	6,822	100.0%
Missing case(s)	202		202	

Occupation:

	Raw sample		Weighted sample	
	Freq	%	Freq	%
Administrators and professionals	2,685	39.4%	1,107	16.3%
Clerks and service workers	1,869	27.4%	2,020	29.7%
Workers	165	2.4%	355	5.2%
Students	248	3.6%	446	6.6%
Home-makers / housewives	290	4.3%	718	10.6%
Others	1,553	22.8%	2,164	31.8%
Total	6,810	100.0%	6,810	100.0%
Missing case(s)	214		214	

Political inclination:

	Raw sample		Weighted sample	
	Freq	%	Freq	%
Pro-democracy camp	3,402	49.8%	1,225	18.0%
Pro-establishment camp	50	0.7%	973	14.3%
Localist	2,427	35.6%	734	10.8%
Centrist	259	3.8%	1,118	16.4%
Others	79	1.2%	184	2.7%
No political inclination / politically neutral / don't belong to any camp	468	6.9%	2,162	31.8%
Don't know / hard to say	142	2.1%	401	5.9%
Total	6,827	100.0%	6,797	100.0%
Missing case(s)	197		227	

Appendix 2: Contact Information

Total valid samples	7,024
Survey period	13/1-7/2/2022
Success rate	7.9%
Questionnaires sent out	88,449
Questionnaires received	11,696
Ineligible samples	117
Invalid samples	3515
Incomplete samples	1,040
Standard error	0.6%
Sampling error	1.2%

Appendix 3: Quantitative analyses

Q1 What do you think is your chance of being infected with the Coronavirus disease, also known as Wuhan pneumonia, in the coming one month? [Logarithmic Scale]	Total	
	Frequencies	Percentages (Base=7,000)
0% chance (Certainly not)	513	7.4%
0.001% chance (1 in 100,000)	940	13.6%
0.01% chance (1 in 10,000)	675	9.8%
0.1% chance (1 in 1,000)	340	4.9%
1% chance (1 in 100)	316	4.6%
5% chance (1 in 20)	405	5.9%
10% chance (1 in 10) }Small chance	482 }4,480	7.0% }64.9%
15% chance	143	2.1%
20% chance	238	3.4%
25% chance	49	0.7%
30% chance	181	2.6%
35% chance	38	0.5%
40% chance	100	1.4%
45% chance	61	0.9%
50% chance	518	7.5%
60% chance	43	0.6%
70% chance	87	1.3%
80% chance }Large chance	120 }337	1.7% }4.9%
90% chance	19	0.3%
100% chance (Certainly will)	67	1.0%
Others	2	<0.1%
Don't know / hard to say	1,566	22.7%
Total	6,903	100.0%
Mean		1.53
Standard error of mean		0.03
Median		0.10
Refuse to answer		*121*

Q2 How satisfied or dissatisfied are you with the government's performance in handling novel coronavirus pneumonia?	Total	
	Frequencies	Percentages (Base=6,997)
Very much satisfied }Satisfied	246 }1,395	3.6% }20.2%
Somewhat satisfied	1,149	16.6%
Half-half	1,258	18.2%
Somewhat dissatisfied }Dissatisfied	892 }4,183	12.9% }60.5%
Very much dissatisfied	3,291	47.6%
Don't know / hard to say	73	1.1%
Total	6,909	100.0%
Mean values		2.1
Standard error of mean		<0.1
Median		1.0
Refuse to answer		*115*
Net value (Satisfied- Dissatisfied)		-40.4%

Appendix 4: Survey questionnaire (13/1-7/2/2022)

We Hongkongers & Community Health Survey

Hong Kong Public Opinion Research Institute is politically neutral. We welcome different opinions. All personal data will be kept strictly confidential. You can fill in the questionnaire again to express your latest views. When we need to work on the data, your last submission will be used. For enquiries, please email us at panel@pori.hk.

Last updated: xxxx-xx-xx

Tentative next update: xxxx-xx-xx

*Required

Eligibility Confirmation

Are you a Hong Kong resident aged 12 or above (i.e., currently residing in Hong Kong)? *

o   Yes

o   No

Community Health

How likely do you think it is that you will contract novel coronavirus pneumonia over the next one month?

(Please select the closest answer)

o   0% chance (Certainly not)   o   20% chance   o   70% chance

o   0.001% chance (1 in 100,000)   o   25% chance   o   80% chance

o   0.01% chance (1 in 10,000)   o   30% chance   o   90% chance

o   0.1% chance (1 in 1,000)   o   35% chance   o   100% chance (Certainly will)

o   1% chance (1 in 100)   o   40% chance   o   _____ % chance

o   5% chance (1 in 20)   o   45% chance   o   Don't know / hard to say

o   10% chance (1 in 10)   o   50% chance

o   15% chance   o   60% chance

How satisfied or dissatisfied are you with the government's performance in handling novel coronavirus pneumonia?

o   Very much satisfied

o   Somewhat satisfied

o   Half-half

o   Somewhat dissatisfied

o   Very much dissatisfied

o   Don't know / hard to say

Other Opinions

Generally speaking, how satisfied or dissatisfied are you with the current …… in Hong Kong?

(Randomise the three conditions)

	Very much satisfied	Somewhat satisfied	Half-half	Somewhat dissatisfied	Very much dissatisfied	Don't know / hard to say
Political condition						
Economic condition						
Livelihood condition						

Personal Information

This section is about personal information. If you have already provided relevant information in this survey series and have nothing to add or update, you may skip these questions. We will use the past data you provided in this survey series for analysis.

o   I have already provided my personal information, and has nothing to add or update (skip questions on personal information)

o   Provide / update personal information now

Gender

o   Male

o   Female

o   Other

Age

o   _____ years old
o   12 - 14
o   15 - 17
o   18 - 19
o   20 - 24
o   25 - 29
o   30 - 34
o   35 - 39

o   40 - 44
o   45 - 49
o   50 - 54
o   55 - 59
o   60 - 64
o   65 - 69
o   70 or above

Educational attainment

(The highest level attended, regardless of whether you have completed the course, including what you are attending)

o   Primary or below

o   Lower secondary (Secondary 1 to 3)

o   Upper secondary (Secondary 4 to 7 / DSE / Yi Jin)

o   Tertiary: non-degree course (including diploma / certificate / sub-degree course)

o   Tertiary: bachelor degree course

o   Tertiary: postgraduate school or above

Occupation

(Owner / self-employed / freelance / part time / civil servant are not valid answers, please answer according to the job nature or

content)

o   Administrator and professional

o   Clerical and service worker

o   Production worker

o   Student

o   Home-maker / housewife

o   Retired person

o   Unemployed / between jobs / other non-employed

o   Other: _____

Which of the following best describes your political inclination?

(Randomise the four camps)

o   Localist

o   Pro-democracy camp

o   Centrist

o   Pro-establishment camp

o   Other: _____

o   No political inclination / politically neutral / do not belong to any camp

o   Don't know / hard to say

End of Questionnaire

Thank you for completing the survey. For enquiries, please email us at panel@pori.hk.
