

2022 年 6 月 7 日 新聞公報

香港民研發放特首及官員民望最新數字 並啟動「一國兩制 25 周年中期民情總結」

特別宣佈

香港民意研究所（香港民研）前身為香港大學民意研究計劃（港大民研）。公報內的「香港民研」指的可以是香港民意研究所或其前身港大民研。

香港民研每半年檢視和調整工作一次，部份改變已在五月四日（即民研三周年）之後啟動，包括下調新聞發佈會的次數和啟動網上公民教育工作。今日開始，我們正式啟動「一國兩制 25 周年中期民情總結」，暫時以兩個月為第一階段，逐個星期以不同形式發佈各個項目總結。民研本星期會先以官員民望打頭陣，下星期再總結六四民情，然後是身份認同和回歸周年，詳情容後公佈。七月開始，我們打算下調定期民意調查的次數，由每月兩次減至每月一次，以便爭取資源進行公民教育和民情總結。同時，民研亦希望教育大眾，數字歸數字，評論歸評論。所有由民調數字引發的個人評論，責任由論者自負，與民研無關。

公報簡要

香港民研於五月尾至六月初由真實訪問員以隨機抽樣電話訪問方式成功訪問了 1,000 名香港居民。最新調查顯示，特首林鄭月娥的評分為 36.0 分，有 27% 受訪者給予林鄭月娥 0 分，民望淨值為負 60 個百分點，評分和民望淨值與一個月前分別不大。局長方面，民政事務局局長徐英偉已離任，而餘下十二位局長之中有五位的民望淨值錄得正數，分別是鄧炳強、黃錦星、邱騰華、許正宇及曾國衛。對比約三個月前，八位局長的支持率淨值上升，二人下跌，二人不變，當中鄧炳強及陳肇始的支持率淨值分別顯著上升 11 和 23 個百分點。另外，曾國衛的支持率淨值創其 2020 年 5 月上任以來新高，楊潤雄的支持率淨值則創 2019 年 8 月以來新高。在 95% 置信水平下，調查的百分比誤差不超過 +/-4%，淨值誤差不超過 +/-8%，評分誤差不超過 +/-1.9。

HONG KONG PUBLIC OPINION RESEARCH INSTITUTE
香港民意研究所

Press Release on June 7, 2022

PORI releases popularity figures of CE and Directors of Bureaux and kickstarts “One Country Two Systems 25-year Mid-term Review”

Special Announcements

The predecessor of Hong Kong Public Opinion Research Institute (PORI) was The Public Opinion Programme at The University of Hong Kong (HKUPOP). “PORI” in this release can refer to Hong Kong Public Opinion Research Institute or its predecessor HKUPOP.

PORI reviews and adjusts its work once every six months. Some changes have already been started after May 4 (i.e., PORI’s 3rd Anniversary), including reducing the frequency of press conferences and developing online civic education. Today, we officially kickstart the “One Country Two Systems 25-year Mid-term Review”. The first phase of the review will take two months, in different forms of releases each week. We will start with the popularity of officials this week, then June Fourth wrap-up, followed by ethnic identity and then handover anniversaries. Details to be announced. Starting from July, we plan to reduce the frequency of our tracking surveys from twice a month to once a month, in order to conserve resources for civic education and mid-term review. Meanwhile, PORI would also like to stress the separation of comments from figures, so that the responsibility of all personal comments arising from our scientific research lies entirely on the commentators concerned, not PORI.

Abstract

PORI successfully interviewed 1,000 Hong Kong residents by a random telephone survey conducted by real interviewers from late May to early June. Our latest survey shows that the popularity rating of CE Carrie Lam is 36.0 marks, with 27% of respondents giving her 0 mark. Her net approval rate is negative 60 percentage points. Both her rating and net approval rate have not changed much from a month ago. As for the Directors of Bureaux, Secretary for Home Affairs Caspar Tsui has left the post and 5 out of the remaining 12 Directors have got positive net approval rates. They are Chris Tang, Wong Kam-sing, Edward Yau, Christopher Hui and Erick Tsang. Compared to around three months ago, the net approval rates of 8 Directors have gone up, 2 have gone down, while 2 remain unchanged. Among them, the net approval rates of Chris Tang and Sophia Chan have increased significantly by 11 and 23 percentage points respectively. Meanwhile, the net approval rate of Erick Tsang has registered a new high since he took office in May 2020 and that of Kevin Yeung has registered a new high since August 2019. The maximum sampling error of percentages is +/-4%, that of net values is +/-8% and that of ratings is +/-1.9 at 95% confidence level.

|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target population | : Cantonese-speaking Hong Kong residents aged 18 or above |
| Sample size ^[1] | : 1,000 (including 500 landline and 500 mobile samples) |
| Effective response rate | : TBC |
| Sampling error ^[2] | : Sampling error of percentages not more than +/-4%, that of net values not more than +/-8% and that of ratings not more than +/-1.9 at 95% conf. level |
| Weighting method | : Rim-weighted according to figures provided by the Census and Statistics Department. The gender-age distribution of the Hong Kong population came from “Mid-year population for 2021”, while the educational attainment (highest level attended) distribution and economic activity status distribution came from “Women and Men in Hong Kong - Key Statistics (2021 Edition)”. |

[1] This figure is the total sample size of the survey. Some questions may only involve a subsample, the size of which can be found in the tables below.

[2] All error figures in this release are calculated at 95% confidence level. “95% confidence level” means that if we were to repeat a certain survey 100 times with different random samples, we would expect 95 times having the population parameter within the respective error margins calculated. Because of sampling errors, when quoting percentages, journalists should refrain from reporting decimal places, whereas one decimal place can be used when quoting rating figures.

Latest Figures

| Net approval rate | -48% | -53% | -67% ^[3] | -65% | -64% | -60+/-5% | +3% |

[3] The difference between the figure and the result from the previous survey has gone beyond the sampling error at 95% confidence level, meaning that the change is statistically significant prima facie. However, whether the difference is statistically significant is not the same as whether they are practically useful or meaningful, and different weighting methods could have been applied in different surveys.

[5] The difference between the figure and the result from the previous survey has gone beyond the sampling error at 95% confidence level, meaning that the change is statistically significant prima facie. However, whether the difference is statistically significant is not the same as whether they are practically useful or meaningful, and different weighting methods could have been applied in different surveys.

Our latest survey shows that the popularity rating of CE Carrie Lam is 36.0 marks, with 27% of respondents giving her 0 mark. Her approval rate is 17%, disapproval rate 77%, giving a net popularity of negative 60 percentage points. Both her rating and net approval rate have not changed much from a month ago.

As for the Directors of Bureaux, Secretary for Home Affairs Caspar Tsui has left the post and 5 out of the remaining 12 Directors have got positive net approval rates, ranked from high to low are Secretary for Security Chris Tang, Secretary for the Environment Wong Kam-sing, Secretary for Commerce and Economic Development Edward Yau, Secretary for Financial Services and the Treasury Christopher Hui and Secretary for Constitutional and Mainland Affairs Erick Tsang. The 6th to 12th positions who have got negative net approval rates go to Secretary for the Civil Service Patrick Nip, Secretary for Development Michael Wong, Secretary for Innovation and Technology Alfred Sit, Secretary for Labour and Welfare Law Chi-kwong, Secretary for Transport and Housing Frank Chan, Secretary for Food and Health Sophia Chan and Secretary for Education Kevin Yeung. Compared to around three months ago, the net approval rates of 8 Directors have gone up, 2 have gone down, while 2 remain unchanged. Meanwhile, the net approval rate of Erick Tsang has registered a new high since he took office in May 2020 and that of Kevin Yeung has registered a new high since August 2019.

Opinion Daily

In 2007, PORI started collaborating with Wisers Information Limited whereby Wisers supplies to PORI a record of significant events of that day according to the research method designed by PORI. These daily entries would then become “Opinion Daily” after they are verified by PORI.

For some of the polling items covered in this press release, the previous survey was conducted from 7 to 11 March, 2022 while this survey was conducted from 31 May to 6 June, 2022. During this period, herewith the significant events selected from counting newspaper headlines and commentaries on a daily basis and covered by at least 25% of the local newspaper articles. Readers can make their own judgment if these significant events have any impacts to different polling figures.
